

Face Detect success screenshot

The screenshot displays the AWS Management Console interface. A terminal window is open, showing the execution of a PHP script that uses the Amazon Rekognition Face Detect API. The script successfully identifies 9 faces in an image. The console also shows the instance details for the EC2 instance running the script.

Terminal Output:

```
login as: ec2-user
Authenticating with public key "imported-openssh-key"
Last login: Thu Apr 2 17:05:12 2020 from 27.4.233.238
